## Uncharted Optimism, Jacob Colker

EPISODE 2 / Guest: Jacob Colker, Managing Director Al2 Incubator

Welcome to Episode 2 of our Evergreen Ventures podcast, *Unchartered Optimism*. Evergreen Ventures is the private investment arm of Evergreen. We seek investments in private markets that offer unique return profiles in markets that are less understood and not as available to the average investor. This includes venture capital, private equity, and private credit, to name a few. On this podcast, Evergreen's CEO, Tyler Hay, will access his rolodex and chat with guests who are pushing the edge of innovation, whether that's in investing or inventing new products and services.

Today's guest is Jacob Colker, Managing Partner of Al2 Incubator, a world-renowned research institute that conducts research in key areas of Al-language, vision, machine learning, and commonsense reasoning.

Featuring guests who are pushing the edge of innovation.
